Special Sessions dedicated to

New didactical strategies and methods in higher technical education

The renewal of didactics has recently received a significant impulse from the recent progress in Information Technology and from the new developments in teaching methods and strategies.

The aim of these special sessions is to stimulate the exchange of ideas in this important field, which not always receives an adequate attention.

Contributions are welcome in (and not limited within) the following fields:

- ? The role of the Information Technology in teaching "Structural Design" and "Construction Processes and Methods";
- ? New educational strategies in designing and planning Structural and Construction Engineering Curricula;

and more in general:

- ? New didactical strategies;
- ? Distance learning;
- ? On-line learning;
- ? Information Technology Based Education and Training;
- ? New roles in the Educational Process and their development;
- ? Orientation and Testing;
- ? Asynchronous Electronic Conferencing;
- ? Distance Education Design and Testing.

Key dates for these sessions

One page abstract (WinWord or RTF):	December 1 st , 2002
Abstract acceptance	January 15 th 2003
Paper submission	April 10 th 2003
Paper Acceptance	April 30 th 2003
